PROFILE

A highly skilled PHP Laravel API Developer with 2 years of professional experience in developing robust, secure, and high-performance RESTful APIs. Proficient in the Laravel framework with strong expertise in backend architecture, database design, and full-cycle API development. Demonstrated experience integrating Facebook Meta APIs for features like social login, user insights, and marketing tools. Adept in implementing modern authentication systems (Sanctum, Passport), optimizing database queries, and ensuring API security and scalability. Familiar with agile workflows and proficient in using tools such as Postman, Git, and Swagger for efficient API testing and documentation. Committed to delivering clean, maintainable code and collaborating effectively in cross-functional teams.

WORK EXPERIENCE

Project: 1.TWG Post – Social Media Automation Platform:

Role: PHP Developer

Tech Stack: Core PHP, MySQL, Facebook Graph API, Instagram Graph API, RESTful APIs, cURL, CRON Jobs, Postman, Gitor

Key Contributions:

Developed a social media automation platform to simplify the scheduling and posting of content across Facebook and Instagram. The platform enables users to schedule posts, manage multiple accounts, track engagement, and automate content delivery.

- Built and maintained RESTful APIs using Core PHP and MySQL to handle user accounts, scheduling, media uploads, and content publishing.
- Integrated Facebook Graph API and Instagram Graph API for seamless content publishing, user insights, and managing media.
- Developed automated post scheduling using CRON jobs to ensure timely delivery of content across media platforms.
- Managed secure authentication and role-based access using custom session management and handling.
- Utilized cURL for efficient communication with third-party APIs, ensuring smooth data exchange between the platform and social media.
- Designed and optimized the database schema for handling multiple user accounts and media content.
- Documented API endpoints and performed rigorous testing using Postman to ensure high performance.

2.Accuwise Tech – IT Solutions & Services Website

Role: PHP Developer

Tech Stack: Laravel, PHP, MySQL, HTML/CSS, JavaScript, Bootstrap

Description:

EDUCATION

Bachelor of Engineering
Technology(B.Tech) GPA: 72%

- <https://accuwisetech.com>
- <https://alavihospitals.in>
- <https://esteticanow.com>
- <https://app.esteticanow.com>

- AccuwiseTech is a corporate website showcasing IT services and solutions across web development, software products, and technology consulting. The platform highlights the company’s offerings, client testimonials, and contact channels, aimed at generating business leads and professional outreach.

Key Contributions:

- Developed and maintained backend modules using Laravel/PHP for dynamic content management, service listings, and contact forms.
- Implemented admin dashboard for managing website content, including service categories, project portfolios, and client inquiries.
- Integrated contact forms with database storage and optional email notifications for lead generation.
- Ensured responsive design and fast performance using Bootstrap and optimized queries.
- Handled deployment, testing, and ongoing support, ensuring site stability and SEO-readiness.

3.Alavi Hospitals – Healthcare Website with Dynamic Blog

Role: PHP Developer

Tech Stack: Core PHP, MySQL, HTML/CSS, JavaScript, Bootstrap

Description:

- Alavi Hospitals is a healthcare website that showcases hospital services, facilities, departments, and health-related updates. The platform includes a dynamic blog section to share medical articles, updates, and wellness tips.

Key Contributions:

- Developed and integrated a dynamic blog module using Core PHP and MySQL, a to add, edit, and delete health-related articles.
- Created custom admin panel for blog and content management with image upload editor support.
- Designed responsive UI for blog listings and detail pages using Bootstrap and cus
- Implemented category-based filtering and SEO-friendly URLs for better search en
- Worked on overall site maintenance, performance improvements, and mobile opt

Project: EsteticaNow – Spa & Salon Appointment Booking Platform

Tech Stack: PHP (Yii2 Framework), MySQL, JavaScript, HTML, CSS, Bootstrap
Role: Junior PHP Developer

Description:

Developed and enhanced a comprehensive spa and salon appointment booking platform with distinct vendor modules for managing services, staff, and bookings. The platform consists of a web application (esteticanow.com) and a vendor portal (app.esteticanow.com), designed to streamline operations for salon and spa businesses.

Key Contributions:

- Developed and maintained backend modules using the Yii2 Framework for efficient service and booking management.
- Implemented vendor-specific dashboards enabling salons to manage appointments, staff schedules, and customer interactions.
- Integrated user authentication, role-based access control, and dynamic service listings.
- Designed intuitive frontend interfaces ensuring smooth user experience for both customers and vendors.
