Professional Summary

Team Leader - 05/2022 to till now

Iopex Technologies, Chennai

- Gathered and analyzed business and technical requirements to define project scope, ensuring alignment with organizational goals.
- Designed scalable application architectures and robust database structures, followed by end-to-end development, unit testing, and deployment of high-performance applications.
- Led a cross-functional development team, promoting effective collaboration, assigning tasks, and tracking progress through tools like Jira.
- Actively participated in the recruitment process, including conducting technical interviews.
- Integrated third-party APIs including Google services, Hubspot, WhatsApp, and various SMS gateways.
- Implemented secure login systems using OAuth and Auth0 with Multi-Factor Authentication (MFA).
- Rebuilt and optimized Jira configuration to align with organizational needs and reduce operational costs.
- Developed a subscription-based product for assessing support call quality and customer service compliance.
- Consolidated multiple enterprise systems to improve operational efficiency, automation, and data accuracy.
- Built a chatbot capable of conducting conversations and extracting data from DOCX, PDF, and Excel files.
- Automated application deployment using CI/CD pipelines with Jenkins and Kubernetes.
- Handled API responses in the frontend to deliver a smooth and responsive user interface experience.

Web Developer - 04/2016 to 05/2022

Klixtech, Chennai

- Designed, developed, and maintained dynamic web applications across diverse domains, including finance and education.

- Built a comprehensive CRM system to manage all aspects of customer interactions—sales, service, leads, inquiries, and transactions—using multi-access group configurations for client trading accounts.
- Contributed to the development of a Learning Management System (LMS) tailored to deliver skill-based educational resources beyond traditional academic models.
- Integrated various third-party services, including payment gateways, SMS gateways, and other external APIs to enhance application functionality.
- Played a key role in modernizing legacy applications by optimizing performance and significantly improving the overall user experience.
- Developed custom OpenCart extensions tailored to specific business needs for multiple E-Commerce projects.
- Designed and implemented RESTful APIs for mobile applications, including trading platforms and E-Commerce solutions.

Junior Web Developer - 03/2015 to 03/2016
