SUMMARY

A highly skilled and passionate Software Engineer with 6 years of experience in developing robust web applications and solving complex problems. Proficient in PHP, JavaScript, Python and Flutter, with a strong background in backend development. Eager to apply my technical expertise and problem solving abilities to contribute to innovative projects.

WORK EXPERIENCE

November 2023 – Present | Smart Owner Private Limited

Software Engineer | Nov 2023 – Present

SuiteCRM:-

- Led the SuiteCRM customization project, developing custom modules and automating workflows to enhance sales and support operations.
- Developed custom reports and dashboards, providing real-time insights into sale metrics, customer service, and lead conversion rates.
- Worked with REST APIs to integrate SuiteCRM with other internal and External systems.
- Configured email templates, user roles, and permissions to enhance the CRM's functionality for various departments (Sales, Crm Team, Finance, Pricing Managers, MIS Team etc.).
- Collaborated with cross-functional teams (Sales, Customer Support Teams) to ensure SuiteCRM was aligned with business goals and processes.
- Regularly updated the CRM software, applying patches and updates to improve functionality and security.
- Implemented game-changing AHT and TAT tracking mechanisms, enabling precise process monitoring, timely client reminders, and actionable plans.

Primeonecorp (Laravel)

- Designed and implemented a responsive and user-friendly interface, ensuring seamless navigation for sales teams and clients.
- Built robust APIs to connect Primeonecorp with SuiteCRM, automating the data synchronization process for leads and enquiries..
- Developed role-based access control to secure sensitive project details and ensure only authorized users can access or modify information.

Gate & Guard Mobile Apps (Flutter)

Gate App

- Designed and developed a user-friendly mobile application for flat and villa owners to manage community activities efficiently.
- Enabled primary owners to add, edit, and delete family members or tenants, granting them role-based access to the app.
- Implemented features for users to invite and manage visitors, staff, and vendors with approval or denial capabilities for gate entry.
- Integrated with SuiteCRM via APIs to handle backend data management, ensuring seamless synchronization of user and visitor information.
- Integrated Firebase Cloud Messaging to handle real-time notifications for approvals, bookings, and visitor updates.
- Developed an amenity booking system for facilities such as badminton courts, volleyball courts, basketball courts, and swimming pools.
- Utilized Firebase for secure and scalable data storage, ensuring seamless performance. Implemented OTP-based authentication for secure user verification using Firebase Authentication.

Guard App

- Designed and developed a user-friendly mobile application for flat and villa securities to manage community activities efficiently.
- Implemented features for securities to manage visitors for gate entry.
- Integrated with SuiteCRM via APIs to handle backend data management, ensuring seamless synchronization of user and visitor information.
- Integrated Firebase Cloud Messaging to handle real-time notifications from flat or villa members.
- Utilized Firebase for secure and scalable data storage, ensuring seamless performance.
- Implemented OTP-based authentication for secure user verification using Firebase Authentication.
