Summary

Highly experienced and results-driven Senior Software Engineer with over +10 years of expertise in full-stack development, including recent experience as a Lead Software Development Engineer. Proven ability to lead complex projects from conception to deployment, design robust architectures, and mentor junior engineers. Specializes in developing scalable web applications using PHP (Laravel, CodeIgniter), Python (Django), and JavaScript frameworks (Vue.js, jQuery, AngularJS), with extensive experience in database management (MySQL, MongoDB) and RESTful API design. Adept at leveraging AI for innovative solutions and contributing to diverse domains including career building, e-commerce, healthcare, and booking systems.

Experience

Sr Software Engineer

NCD Services Pvt Ltd (Jun 2025 - Oct 2025)

Led the development of innovative AI-based applications. Project 1: Designed and built an AI-powered career build application featuring AI-based resume creation (with diverse templates), AI-based cover letter generation from job descriptions, AI job fit analysis with suggestions, and AI-powered LinkedIn profile optimization. Project 2: Developed a comprehensive support ticketing application.

Senior Software Engineer

Tuna Software Solutions Pvt Ltd (Nov 2023 - May 2025)

Responsible for designing architecture, technical, and domain requirements, as well as development. Key projects included: A theater booking application for a top US theater group; an online medical application integrating with SAP for product retrieval, price tiers, and order synchronization; and a QR code based restaurant food booking application for a major amusement group in the US, allowing customers to view menus and book from scanned QR codes.

Sr PHP developer

TechMaven IT Solutions Pvt. Ltd (May 2021 - Aug 2023)

Participated in the design and architecture of scalable, reliable, and high-performance software solutions. Developed, tested, and maintained software applications using industry best practices. Collaborated effectively with product managers and designers to gather requirements and provide technical expertise. Provided leadership and mentorship to junior engineers, guiding them in software development processes.

Senior Software Engineer

AlignMinds Technologies (Nov 2020 - Mar 2021)

Played a crucial role in the design, development, and deployment of complex software solutions. Worked collaboratively with a talented team of engineers and contributed to the successful completion of various projects across different domains.

Senior Software Developer

Innoxgen Solutions Pvt Ltd (Jan 2019 - Oct 2020)

Played a pivotal role in the development and delivery of high-quality software solutions. Contributed significantly to architectural decisions and technical strategies, with a strong focus on scalability, security, and performance. Maintained awareness of emerging technologies and industry trends, proactively recommending their adoption to enhance development processes and project outcomes. Actively participated in refining and optimizing software development methodologies within the organization.

Senior Software Engineer

Acodez IT Solutions Pvt. Ltd. (Aug 2016 - Jan 2019)

Successfully led and developed major software projects on time and within budget as a Senior Software Engineer. Worked with a custom application development team, handling individual projects from scratch, including: Okazjo (Event management portal), 12amclub, filtr3 (Dating application), and True-parking (Customer book parking slots based on vacancy).

PHP Developer

Adwaita technology (Nov 2014 - Jul 2016)

Worked on the development of a major School management system. Assessed initial set-up requirements and implemented appropriate hardware and software solutions. Contributed to various projects including the School management system and a Ticketing System.

Education

BCA, Bharathiyar University (2011)

Skills

FastAPI

Angular

AWS

Projects

AI-based Career Building Application

Developed an AI-powered platform for job hunters, featuring AI-based resume building (with diverse templates), AI-generated cover letters from job descriptions, AI job fit analysis with personalized suggestions, and AI-driven LinkedIn profile optimization.

Support Ticketing Application

Developed a comprehensive system for managing support tickets.

Theater Seat Booking Application

Designed and developed a theater booking system for a leading US theater group, handling online reservations and ticketing.

Online Medical Application (SAP Integration)

Built an online medical platform that integrates with SAP for retrieving product details and price tiers, and synchronizing order information back to SAP.

QR Code Restaurant Food Booking Application

Created a QR code-based system for a top amusement group in the US, allowing customers to scan a QR code at their table to view menus and place food orders directly.

12amclub

Contributed to the development of the 12amclub project.

filtr3 (Dating Application)

Developed features for the filtr3 dating application.

True-parking (Parking Slot Booking)

Built an application for customers to book parking slots based on real-time vacancy.

School Management System

Worked on a major school management system, including assessing setup requirements and implementing software solutions.

Ticketing System

Developed a general-purpose ticketing system.
