Profile

Results-driven IT professional with over 13 years of experience in the software industry, including 3 years as a Technical Project Manager and 10+ years in hands-on development. Highly proficient in PHP frameworks such as Laravel and Magento, with deep expertise in customizing and optimizing third-party CodeCanyon applications. Adept at leading cross-functional teams, managing project lifecycles, and delivering scalable, secure solutions. Skilled in AWS cloud services, version control, and agile methodologies, with a strong focus on performance, reliability, and business alignment.

Professional Experience

Senior Laravel Developer, RVZ Solutions Private Limited

06/2024 – present
Trivandrum, India

- Built and maintained scalable web apps using Laravel, sticking closely to modern PHP (PSR) standards — tried to keep things clean and consistent.
- Took ownership of API design — set up RESTful endpoints, service layers, and kept the backend modular so things wouldn't turn into spaghetti code later on.
- Crafted and tuned up some pretty complex MySQL schemas; handled migrations, seeding, and built out data factories for testing/demo purposes.
- Hooked up various third-party services — things like payment gateways (Stripe, PayPal), CRM APIs, and other integrations.
- Applied SOLID principles wherever it made sense, and followed Laravel's best practices (well, most of the time!) to keep things maintainable.
- Regularly did code reviews and helped guide junior devs — both for quality control and just general team growth.
- Wrote plenty of tests — from unit tests to full integration suites — mostly using PHPUnit and Pest, to make sure we caught issues before they reached production.
- Worked closely with designers, frontend folks, QA, and DevOps to get features across the finish line.
- Took part in planning — helped break down user stories, estimate dev time, and figure out technical approaches early on in the sprint cycle.

Senior Laravel Developer, WBPro

03/2023 – 05/2024
Florida, US

- Architect and develop robust, secure, and scalable web applications using Laravel and Magento.
- Customize, extend, and integrate third-party CodeCanyon applications to suit business requirements.
- Develop and maintain RESTful APIs for frontend/backend integration and third-party services.
- Write clean, maintainable, and well-documented code following modern PHP and Laravel best practices.
- Manage database design, optimization, and complex SQL queries using MySQL/PostgreSQL.
- Handle deployment, version control (Git), and continuous integration workflows.

- Implement role-based access control, multi-tenancy, and modular code structures.
- Optimize performance and scalability of high-traffic applications.
- Collaborate closely with frontend developers, UI/UX designers, and QA teams to ensure seamless delivery.
- Troubleshoot, debug, and upgrade legacy systems or codebases.
- Conduct peer code reviews and mentor junior developers on technical best practices.
- Integrate AWS services (S3, SES, EC2, CloudFront) into application architecture.
- Implement secure coding practices, including input validation, authentication, and encryption.
- Create technical documentation, including architecture diagrams, flowcharts, and developer guides.

Associate Project Manager/Scrum Master,

RM Education Solutions Private Limited

06/2021 – 02/2023

Trivandrum, India

- Managed product backlog and facilitated monthly sprint releases within the Scrum framework.
- Applied Agile methodologies to reduce development cycle times and consistently achieve target margins.
- Collaborated with product owners, developers, and cross-functional teams to define solutions and drive project momentum.
- Coached teams on Agile principles and conducted training sessions to foster an Agile mindset across departments.
- Led sprint ceremonies including planning, reviews, retrospectives, and daily stand-ups to ensure alignment and productivity.
- Conducted backlog grooming sessions to prioritize tasks and improve delivery timelines.
- Assigned and managed project responsibilities across internal team members and external resources.
- Fostered open communication and collaboration, addressing team feedback and resolving conflicts effectively.
- Championed continuous improvement throughout the product development lifecycle.
- Acted as a bridge between engineering teams and external departments to resolve technical issues and blockers.
- Trained staff on internal tools, platforms, and applications to improve efficiency and adoption.
- Monitored and tracked key project metrics to ensure timely delivery and scope adherence.
- Coordinated with third-party vendors and partners to deliver critical components of IT projects.
- Identified performance gaps and implemented corrective actions to enhance team effectiveness.
- Communicated project updates, risks, and milestones to stakeholders at all organizational levels.
- Successfully led and managed a team of 15+ members, driving high performance and team engagement.

Senior Magento Developer, Mandy Technologies

02/2019 – 12/2021

Coimbatore, India

- Highly skilled at working both independently and as part of a collaborative team environment.
- Led group projects as a team leader, delegating tasks effectively and providing constructive feedback to drive team success.

- Developed and maintained positive, courteous, and professional working relationships with colleagues and clients.
- Self-motivated with a strong sense of personal responsibility and commitment to delivering quality results.
- Demonstrated success in meeting tight deadlines and thriving in fast-paced, high-pressure environments.
- Proven ability to learn quickly and adapt to new challenges, technologies, and processes.
- Applied strong analytical and problem-solving skills to develop innovative and effective solutions to complex issues.
- Excellent verbal and written communication skills, ensuring clarity and alignment across teams and stakeholders.

Senior PHP Developer, Brainpan Innovations

04/2016 – 12/2018

Gurgaon, India

- Planned and executed full-cycle website development, transforming mockups and wireframes into responsive, interactive web applications using HTML, JavaScript, AJAX, and JSON.
- Developed dynamic and responsive websites using HTML, CSS, JavaScript, and jQuery to ensure cross-browser compatibility and performance.
- Reviewed and validated third-party code to ensure alignment with internal coding standards, security protocols, and technical specifications.
- Analyzed and determined requirements for custom scripts, implementing tailored solutions to meet project-specific needs.
- Successfully designed and developed a comprehensive **Hospital Management System** from scratch, integrating patient management, billing, appointment scheduling, and reporting modules.

Senior PHP Web Developer, Techions Software Labs

01/2015 – 02/2016

Kochi, India

- Planned and executed website development by converting mockups into fully functional web interfaces using HTML, JavaScript, AJAX, and JSON.
- Built responsive and interactive websites using HTML, CSS, JavaScript, and jQuery, ensuring optimal user experience across devices.
- Developed technical solutions to support and enhance user-facing components based on specific project requirements.
- Reviewed and validated third-party code to ensure compliance with internal coding standards and technical specifications.

Trainee/Junior Web Developer, Ethnix Solutions

08/2011 – 12/2014

Calicut, India

- Quickly learned new programming languages, tools, and development processes to support team goals and project requirements.
- Attended technical training sessions and workshops to build foundational knowledge in PHP development, frameworks, and industry best practices.
- Completed documentation and timesheets accurately in compliance with organizational processes and project guidelines.
- Shadowed senior developers to gain hands-on experience with backend development tasks, debugging, and database operations.
- Collaborated with cross-functional team members from diverse backgrounds to deliver project components and resolve technical challenges.

Skills

Agile & Scrum Methodologies (Sprint Planning, Daily Stand-ups, Retrospectives)		Product Backlog Management & User Story Grooming	
Cross-functional Team Leadership (Internal & Remote Teams, 15+ Members)		Project Lifecycle Management (Initiation to Delivery)	
Risk Assessment, Resource Allocation & Conflict Resolution		Stakeholder Communication & Client Engagement	
Vendor Coordination & Third-party Integrations		Solution Architecture & Technical Planning	
Code Reviews, Version Control (Git), and CI/CD Processes		Mentoring & Training Junior Developers	
Cross-team Collaboration (Dev, QA, UI/UX, Product)		Technical Documentation & API Design Standards	
Decision-Making on Technology Stacks and Development Approaches		Integration with Payment Gateways and Third-party APIs	
AWS (S3, SES, EC2, RDS, CloudFront)		Git, GitHub, Bitbucket,	
Docker (Basic Understanding), Deployment Automation		Effective Delegation & Time Management	
Strong Problem-solving & Analytical Skills		Quick Learner & Adaptive in Fast-paced Environments	
Self-motivated with a Sense of Ownership and Accountability
