

Jignasha Denish Jagani

Senior Software Engineer

8 Years 1 Month

(+91) 6351869848

jigspatel179@gmail.com

Profile Summary

Highly accomplished, solutions-driven Senior Full-Stack Engineer with over 8 years of extensive experience designing, developing, and deploying enterprise-scale web applications. Proven track record in migrating legacy systems to modern, type-safe architectures using Node.js, TypeScript, and Laravel, paired with scalable frontend architectures in Vue.js (Pinia/Vuex). Highly specialized in high-concurrency Travel-Tech Engines (Air, Bus, Rail booking platforms), high-volume cross-border E-commerce platforms (managing 100,000+ SKUs across MENA markets), and robust Fintech API architectures (BBPS, DMT, Cashfree integrations). Recognized for deep expertise in structural database optimization (PostgreSQL, MySQL), resolving critical N+1 query bottlenecks to cut latency by 60%, and implementing secure, idempotent transactional flows. Adept at handling complex end-to-end API orchestrations, leading microservices development, and collaborating on high-impact projects simultaneously.

Education

MCA, 2015

Atmiya Institute of Technology & Science, Rajkot

B.C.A., 2012

Saurashtra University

12th, 2009

Gujarat, Gujarati

10th, 2007

Gujarat, Gujarati

Work Experience

May 2021 - Present

Senior Software Engineer

Techsevin Solution LLP.

Senior Full-Stack Developer Node.js, TypeScript, Laravel developer, php developer| Specialized in High-Concurrency Travel-Tech Engines & E-Commerce, Mentions high-concurrency systems, multi-country architectures (The Sultan Center operations), and critical engineering accomplishments (solving (N+1) issues, reducing latency by 60% . and making any difficult report with optimized query.

May 2021 - May 2021

Key skills

- MySQL
- HTML
- Javascript
- jQuery
- CSS
- Ajax
- PHP
- Web Development
- SQL
- Rest API Development
- Rest API Integration
- Payment Gateway Integration
- Laravel
- Node.js
- Vue.js
- Redis Database
- Zend Framework
- Laravel PHP Framework
- MongoDB Database
- Postgresql

Personal Information

City Ahmedabad

Country INDIA

Senior Software Engineer

Techsevin Solution LLP.

Senior Software Engineer with 8+ years of experience architecting high-performance web applications, specialized in driving the migration of complex legacy systems into modern Node.js, TypeScript, and Laravel microservices. My career spans building regional cross-border infrastructure, sub-second search engines, and integrated transactional layers. Core Architecture Highlights: • Enterprise E-Commerce (The Sultan Center): Engineered backend services for a massive regional retail platform spanning Kuwait, Oman, and Jordan—managing a 100K+ SKU catalog and country-specific VAT calculation engines. • Travel-Tech (AIREO): Architected a unified, high-concurrency booking engine for Air, Bus, and Rail. Integrated complex GDS APIs, optimized real-time search queries using Redis, and engineered built-in utility systems like BBPS (Bill Payments) and DMT (Domestic Money Transfer), AEPS, payment gateway like CASHFREE. • Legacy System Modernization: Deep expertise in optimizing performance, eliminating N+1 query bottlenecks, and seamlessly transitioning Core PHP/Zend Framework architectures into scalable Node.js frameworks. Tech Stack: • Backend: Node.js, TypeScript, PHP 8.x, Laravel, Zend Framework, Core PHP • Frontend: Vue.js, JavaScript (ES6+), JQuery, AJAX, HTML5/CSS3 • Databases & Tools: PostgreSQL, MySQL, Redis, mongodb, Git, RESTful APIs Open to senior and lead opportunities in GIFT City, Ahmedabad-based tech leaders, and Global Remote roles. Let's connect!

Feb 2020 - May 2021

Software Engineer

Cetaceans Techlab PVT.LTD.

1) Collaborate with web design and development team to create a new website for a tech start up, assisting with coding. 2) Assist design team with coding to create a user-friendly interface that is compatible across every major operating system. 3) Responded to user feedback, reported issues are resolving them in a timely manner.

Jan 2019 - Jul 2019

Web Developer

Radixweb Technosoft LLP

Maintained and advanced large product-base software architectures centered on high-scale corporate customized design and dynamic printing software. • Projects - imagemagic.com.my & printlinkonline.com: Formulated browser-based dynamic vector print layout design canvases built on Zend Framework, Twig Template engines, and advanced object-oriented vanilla JavaScript. • Automated Cost-Engine: Engineered a complex multi-parameter commercial invoice calculation routine that evaluates absolute canvas dimensions, custom paper weights, material densities, and regional delivery charges to generate final billing. • SAAS Suite Quality Assurance: Optimized micro-calculators for webtoprintit.com and performed load and quality evaluations for cloud-hosted enterprise multi-tenant SAAS installations.
