- Malayalam(Native)
- Tamil(S)

About Me

As a diligent and motivated BCA graduate, I am passionate about leveraging my technical skills to contribute effectively to the dynamic field of computer applications. With a solid foundation in programming languages such as Java, C++ and Python Driven by I am enthusiastic about the opportunity to embark on a fulfilling career journey where I can leverage my skills to drive innovation and success.

Projects

Online Voting System

Built by frontend language as Java and backend language as Eclipse and NetBeans IDE

- An Online Voting System is a software application that allows eligible voters to cast their votes electronically through the internet. It is designed to provide convenient and efficient wayfor voters to participate in elections without having to physically visit polling stations.

Internship-Data Entry

*Safe Technologies ,Palakkad
July 2023-Sep 2024*

- Data entry refers to the process of inputting, updating, or managing data in a digital format, such as a database, spreadsheet, or software application. This can include entering text, numbers, or other types of information into designated fields or templates. Data entry is essential for maintaining accurate records, generating reports, and facilitating efficient data management in various industries and organizations.
